

# Publishing your research

Lewis Spurgin

March 2017

Why publish your  
research?

# Lucky scientists

## CEEC science

Science news & events blog from the Centre for Ecology, Evolution & Conservation at the University of East Anglia

Blog About CEEC Science

### CEEC Science

CEEC science is a blog about news, science & events from the Centre for Ecology, Evolution and Conservation at the University of East Anglia. It is a platform for PhD students and research staff to share their experiences and tell the story of their own research. CEEC brings together staff and students based in two departments, the [School of Biological Sciences](#) and the [School of Environmental Sciences](#). Our diverse research community works across multiple spatial scales from understanding global biodiversity patterns to the genetic and evolutionary processes that shape our environment. We organise an annual student run conference called the [Rebellion](#), which brings together faculty, MSc, PhD students, and Post-docs from across CEEC to present and discuss their current research. For a full list of our upcoming seminars please see [here](#). You can also follow us on twitter [@ueaceec](#).

# Publishing and academia

# Common arguments against publishing research

- I'm not carrying on in science
- My results aren't significant
- My results aren't interesting

# How to write a paper

# How to write a paper

1. Write a paper
2. Make it good

# Other tips

# Celebrate small achievements
